

9 Critical Secrets to How You Can Turn Back the Hands of Time, Smile Confidently and Chew Comfortably While Eating the Foods You Love

*Medical Miracle Gives
Denture Wearers the
Confidence & Chewing
Force of 90% of What
You had when YOU
were a Young Adult*

Dear Friend,

Who said you can't turn back the clock?

Whoever it was clearly didn't know about innovative dental options to **fix loose-fitting dentures or replace missing teeth.**

Breakthrough technology exists to give you back what you lost with dental implants.

No More Worries About:

- Dentures coming loose as you laugh, cough or sneeze.
- A thick layer of nasty tasting denture adhesives interfering with your enjoyment of food.
- **Wrinkles** from loss of bone and tissue to support the delicate muscles of the face.
- Watching what you order at restaurants for fear that you won't be able to chew it in front of your friends and loved ones.
- *Sores from loose-fitting dentures rubbing your gums.*

I know that may sound a little like hype, but it's not. The reason being is that most people, perhaps yourself, who experience these problems or desires, never realized that the solutions were available and can be fixed faster than they ever imagined.

Before I tell you about the breakthroughs that our patients have experienced, let me see if you would be a candidate for the same type of results:

- ✓ Are you especially scared of the dentist, or have had a bad dental experience in your past and decided to put off needed dental care?
- ✓ **Do you look in the mirror and see a smile that embarrasses you?**
- ✓ **Do you have MISSING teeth, FAILING teeth or ill-fitting dentures that just don't work?**
- ✓ **Are you tired of social embarrassment**, not getting noticed by that special someone or looking older than you are?
- ✓ **Do you seriously desire to CHEW COMFORTABLY and knock 10 years off your appearance?** (Hint: Many of our patients claim that most people rave about how they look like they've "lost weight, gotten a haircut, and look 10 years younger" as a bonus from their new smile)
- ✓ Do you secretly desire **to have a bright, white, healthy smile, preserve your existing teeth and live a longer, healthier, happier life?**
- ✓ Are your existing dental problems most likely due to putting off dental care because of **fear, anxiety, or a busy schedule?**
- ✓ **Are you sick and tired of ill-fitting dentures, missing, or worn out teeth?**

If you've answered "YES" to any one of these questions then this report may just be the most important and emotionally life changing one you've ever read.

**Get back more than
your teeth;
recapture your youth
and well-being!!!**

Here's why: There is a solution, and this solution can literally give you teeth that are 90% as strong as your original teeth. You'll be smiling with confidence once again. We will stabilize any dentures that you may have, or completely eliminate the need for dentures.

The “Miraculous” Solution That Many Seniors and Baby Boomers Have No Clue About...

...the invention of the Dental Implant!

Now, before you dismiss Dental Implants as a viable option, I'd like to ask you to set aside any pre-conceived notions or beliefs about dental implants that you might have until I fully explain:

- **What Dental Implants Are**
- **9 Critical Reasons** Of How They Can Benefit Your Life and Why People Choose Implants Over Other Options!
- **Answer the most common questions people have about getting them.** Like, “How long does it take?” And “Are Dental Implants painful?”
- **How You Can Afford Them!** While Dental Implants are not cheap, we have different financing and pricing options that make them more affordable than ever! Let's answer the first question:

“What are Dental Implants... and How Do They Work?”

Dental Implants are artificial tooth roots that provide a permanent base for fixed, replacement teeth. Compared to dentures, bridges and crowns, dental implants are a popular and effective long-term solution for people who suffer from missing teeth, failing teeth or chronic dental problems. Because they fit, feel and function like natural teeth, dental implants are quickly becoming the new standard in tooth replacement.

Start with an end in Mind:

Know yourself before you know your options.

When it comes to dental implants: there are 2 categories where most patients fall in:

1. You have 1-2 missing teeth where dental implants are needed to reestablish the bite and prevent further damage while natural teeth still exist
2. Dental Disaster: when the natural teeth are getting to a terminal stage and dental implants are coming to the help to rebuild the whole house

MISSING A TOOTH?

Missing a single tooth is a serious issue that can cause long-term damage to facial structure, bone density, and even your ability to feel confident in your smile.

Option #1 Do Nothing

You do nothing. The cost down the road can be substantial. Dentistry isn't expensive. Neglect is.

Option #2 Dental Implants

This option is most expensive, but also most effective, functional and aesthetically pleasing. Implants last a lifetime.

Option #3 Dental Bridge

This option costs less than implants, but you cut down good teeth to use as anchors. It needs to be replaced every 5-7 years.

Option #4 Removable Partial Denture

This option is least expensive, but its bulky plastic complicates eating and it needs to be removed each night.

Note: Dental insurance will provide some coverage for single implants and our insurance experts will explain to you how we can maximize on that if possible.

DENTAL DISASTER?

Missing multiple teeth is a serious issue that can cause long-term damage to facial structure, bone density, and even your ability to feel confident in your smile.

Your Options for Treatment

Option #1

Same Day

All On 6 Zirconia Bridge

New teeth in just one day. An all Zirconia bridge is sculpted just for you from a unique high-quality material that is resistant to chipping, and staining unlike acrylic, Zirconia will not chip, crack or stain like acrylic bridges. All zirconia are easy to keep clean as they don't attract plaque or stains or odors. Zirconia is exceptionally durable, so it fits comfortably and feels as natural as it looks.

Option #2

Signature Fit Dentures

A "Signature Fit Denture" is a type of dental prosthetic that can be used to replace an entire arch of missing teeth. A patient who has many missing or failing teeth, or is currently wearing traditional dentures or a fixed bridge, often considers Signature Fit Dentures for a full-mouth restoration. Rather than using metal clasps or natural suction to stay in place, it relies on multiple dental implants placed directly into the jawbone. The denture itself can then be fitted onto these implants, helping them stay in place unlike traditional methods that need glues and adhesives.

60%

A full-mouth restoration is exactly what it sounds like, restoring natural-looking teeth to both arches. Upper and lower teeth are supported by multiple dental implants - spread evenly across the jaw. Patients can expect to get their old smile back and enjoy much more natural chewing and eating compared to regular traditional dentures.

Option #3

YOU CAN DO NOTHING

If you do nothing you will continue to hate the things you already dislike about your dentures. They don't stay in place, you can't eat the foods you enjoy, they impair your speech and can have a negative impact on your self confidence.

15%

What is it worth to you to be able to enjoy the foods you love again? To be able to feel confident in your smile?

How Implants gave a frustrated Housewife back her smile

Janet was a middle-aged housewife who saw her smile deteriorate over the years through neglect and bad genes.

She started getting cavities and experienced bone loss. Many of her upper teeth were extracted because of decay and she ended up needing to wear a full upper denture, which she hated.

Janet said it made her feel old like her grandmother. She also complained that it gave her a “caved in” look when she took the denture out. But her biggest complaint was that because she had a strong gag reflex, she was actually gagging on it a lot of the time.

There wasn't enough bone to replace all her upper teeth with implants, so I placed as many implants as possible and made a solid bar that clipped into a thin, sleek, and incredibly stable denture. This clip-on denture gave her the benefit of the full set of teeth, just like a regular full upper denture. However, the clip-on denture was much more secure and did not cover her entire palate like a regular denture.

Often, as people age, the bone underneath the missing teeth melts away, making implant placement impossible without invasive bone augmentation. So if you are considering implants, time is of the essence.

Janet was glad she did it. Not only does she love her new smile, she's not gagging anymore and she's able to eat whatever she wants again. And she looks ten years younger.

Hopefully, by now, you can see the power of having Dental Implants.

Here are the 9 Critical Reasons and Benefits People Experience with Dental Implants

- 1. You Will Look 10 Years Younger -** Dental Implants assist you in looking and feeling younger, because they prevent bone loss. By preventing bone loss that would normally occur with the loss of teeth, your facial structures remain normal and intact. The chances of wrinkling and the look of old age before your time is less likely. Implants prevent the bone loss that would normally occur with the loss of teeth. In other words, everyday that you continue to wear dentures, or have missing teeth, you are experiencing bone loss, which makes you look much older than you have to. By using dental implants **your facial structure and jaw remains strong, healthy and intact.** This is especially important when all of the teeth are missing, because the lower one-third begins to *collapse* if implants are not placed to preserve the bone.
- 2. Overall quality of life is enhanced with replacement teeth that look, feel and function more like natural teeth.** You will look younger and more attractive which allows you to be even more confident and enjoy smiling, laughing, and talking with others.
- 3. You can now live longer, because you'll get to eat better and prevent malnutrition or stomach problems!** Fresh vegetables, corn, and fruits are back on the menu! You can now eat the foods you like. Also, since your chewing is improved, your digestion will be even better as well!

4. **More Confidence in social situations.** Most of our patients love their new implants because of their improved appearance, function, comfort and health. When you go out in public, you will never have to cover your mouth with your hand, or put off eating out of fear of a denture popping out or gagging you. Also, the improved appearance of your new smile will have people giving you compliments galore.
5. **Allows you to relax and be worry-free about your dentures moving around, popping out, or gagging you. Eliminate Denture Adhesives FOREVER!** Since implant supported teeth are securely attached, there is no need for messy adhesives. You'll never worry about your dentures flying out when you laugh, sneeze, cough, or when you eat. Implants are so securely attached that the fear of them falling out will be eliminated! Like I said before, these will feel like they are your natural teeth.
6. **Your mouth will be restored as closely as possible to its natural state.** By replacing the entire tooth, as well as the tooth root, it is possible to replicate the function of natural teeth, with a strong, stable foundation that allows comfortable biting and chewing. Also, nothing in the mouth looks or feels false or artificial!
7. **Increases the amount of enjoyment you get out of eating.** You will be able to **taste foods more fully.** Wearing an upper denture can prevent someone from really tasting food, as the roof of the mouth is covered. With implant supported replacement teeth, it is not necessary to cover the roof of the mouth, so you can truly enjoy the taste of foods.
8. **Improves overall oral health and decreases the risk of oral cancer and heart disease.** It is much easier to care for implants of any kind versus dentures. Your chances of bacteria build-up and gum disease decrease when you have implants.
9. **Your other teeth will not be affected because of missing teeth.** Since replacing missing teeth with implant supported crowns and bridges does not involve the adjacent natural teeth, they are not compromised or damaged.

For example, when you wear a partial denture, you have clamps that hook onto adjacent teeth, which puts pressure on them that causes them to loosen and fall out. Bridges require grinding down of the adjacent teeth so that the bridge can be cemented on. This tooth structure can never be replaced and the long-term health of these teeth is compromised.

As you can see, I'm a huge fan of dental implants. I love seeing my patient's lives change as a result of them. My guess is that if you have read this far you are seriously interested in possibly choosing Dental Implants as a viable option to your situation, but I'm sure you have questions or concerns. Below are answers to the most common questions I get regarding implants.

The 3 Most Common Questions I Get From Patients Considering Dental Implants

Q: How Painful Is It To Get Dental Implants?

A: Most of our patients report that they feel very little, if any, pain during the procedure. In fact, many patients do not have to use any pain pills. Your decision to use implants will help you to avoid much pain and discomfort in the long term.

Besides, given the overall health care benefits, you should not deny yourself proper treatment out of fear of pain. As with any medical or dental procedure, your dentist is equipped to provide you with appropriate treatment, including any pain medicines you need.

During the treatment, you can have movies on a DVD player, music on headphones; you relax in contouring chairs with optional massage pads. In many cases, the hi-tech Electronic Anesthesia and topical numbing preparations applied without needles is sufficient.

Also, if your **especially fearful, phobic, or pain sensitive you have the option of doing the procedures with sedation dentistry.**

How this works: You take a small pill before you come into the office and you rest peacefully as we do our work. With this option you barely remember the procedure the next day, but get a ton of dental work done in just 1 visit.

Finally, to make sure you are comfortable when you leave our office, you'll get a prescription if necessary. Plus we will call to make sure that you are not in any abnormal amounts of discomfort. Our goal is to give you stronger, more comfortable teeth, without the pain or discomfort!

Q: Do You Offer Any Warranty?

A: Yes. Even though dental implants have over a 95% success rate, there is still a very small chance that they won't completely bond. We offer a 5-year "No Questions Asked" warranty. If there is a problem we keep working for FREE until we get it right. The only thing you need to do is make sure you come in for your regular scheduled visits so that we can keep your gums and teeth healthy, which will prevent any possible problems.

Q: What is the Cost of Implant Treatment?

A: Many people call and ask us, "How much is one implant going to cost?" While I wish it was that simple, the only way to determine actual cost is by coming in for a consultation and examination to find out if you have bone loss or if you'll need one, two, or more implants.

Obviously, costs vary greatly depending on your needs and desires. If you read all the letters we get from patients you will find a couple who chose implants, instead of a cruise as an anniversary present to each other.

So yes, you will need to look at implants as an investment, because it really is a significant decision. A cruise or other trip ends after 5-7 days. Or you can purchase more "stuff" for the house, however is that really as important as the very best appearance possible and the best possible health?

Price Chart

Single Implant

Final pricing to be determined based on dental insurance and whether there is need of a bone graft.

Price: Starting at \$4,500

Same Day All on 6 Zirconia Bridge

Insurance does not cover any costs associated with this

Price: Starting at \$29,000 or as low as \$400 per month

Signature Fit Dentures

Insurance does not pay any benefits towards this option

Price: Starting at \$16,000 or as low as \$200 per month

Do Nothing

No price can be put on not being able to chew foods or having questions about self confidence.

A healthy mouth or magnificent dazzling smile pays dividends in many ways **for your entire life**. Anyway, Dental Implants are admittedly not the least expensive option. If your primary concern is a lowest possible investment, then dental implants are not for you.

If on the other hand, a reasonable investment and a fair price is important to you, but far more important is the best **possible outcome, the least pain and discomfort, the most gentle care and highest degree of expertise and professionalism**, then implants are for you.

Incidentally, a variety of payments plans are available. Of course, all major credit cards are accepted, so you can get your airline miles or reward points. Some patients report that they received 5 days in a top resort with the reward points on their credit card. Expert assistance in obtaining reimbursements from your insurance provided free of charge.

All-Inclusive Approach! One Team, One Cost, One Location

Our team of doctors work together to deliver excellent treatment to our patients. It used to be difficult to know the full price of dental implant procedures. Different specialists had different fees that would add up at each stage of the process. Since our doctors, technicians and labs are all on site, we are able to give a single price for the entire procedure from start to finish. **There are no surprise fees and no hidden costs**. After your consultation, you will know exactly what it will cost to complete your dental implant treatment.

What to Do Now!

As we've discussed, Dental Implants are the fastest way to replace up to 90% of your chewing force. It is the ideal way to **get back what has been stolen from you...** the magnificent youthful smile you deserve.

If you'd like to find out if you are a candidate and qualify as a patient for Dental Implants, then just give us a call . I offer a FREE Dental Implant Evaluation so that patients, like you, can have a no-risk opportunity to have all their questions answered and see if they are a candidate.

We will have you come in for a 30-minute session to get some x-rays, look at your gums, and most importantly find out what it is YOU WANT.

Simply put, you get to tell me what you want! And I'll tell you what options there are and be 100% of service to you. And that's it. If, at the end of the consultation, you do not feel like we can help you, or that dental implants are not a "fit" for you, then we completely respect your decision.

There is NO PRESSURE from us at all. We are simply here to help you find out what you want to do.

I'll be happy to answer your questions – or have you come in and give you a **FREE Dental Implant & Healthy Smile Consultation** – without any obligation.

Sincerely,

Your Team at Signature Smiles

P.S. Time is Running Out! **THE FREE Dental Implant & Healthy Smile Consultation OFFER IS FOR A LIMITED TIME ONLY** so call immediately to reserve your spot.

★★★★★ a year ago

They are so polite there and make me feel so comfortable. I hated going to the dentist till I started coming here. I didn't even have to tell them; they just knew by how nervous I was and they were so great with me!! I will be going here from now on even if I have to make the drive it's worth it!!!

Katylyn Kuchta

1 review

★★★★★ 3 months ago - 

I've been coming here since the beginning, when it first opened, and I have never met a better group of people who make me feel like I'm a part of the family. Dr. Salameh and Tiffani are a dream and have helped me change my perspective of the dentist. I'm no longer terrified to schedule an appointment, I'm actually thrilled to stop in. The business is growing but they certainly haven't lost that small-business feel. They know each patient and make each one feel welcome and supported. I cannot say enough great things about the Signature Smiles team!

Michelle Alvis

1 review

★★★★★ a month ago

I went in after looking for a sedation dentist. NOT a fan of dentist. I had to have an extraction, and had to make another appointment for it to be done. Anxiety on the increase! Went back though. BEST dental appointment I've ever had. Nitrous gas is definitely the way to go. I'm 10 hrs post op as I type and my family can't believe how comfortable I am based on their own experiences with other dentists. Try them, you won't regret it!!
